Course outline
<p>Agricultural Economics deals with a diversity of subjects from production, processing, marketing, trade, regulations on rural development and global environment. In this course, globalization and food sovereignty issues will be discussed. The textbook will provide a critical look at power dynamics in the food system from the local to the global level. We will discuss both theoretical insights and a range of case studies using the textbook.</p> <p>Depending on interests of participants, some of the contents may be changed.</p>

Attainment objectives
<p>The students will be able to have their own ideas on the future of the food system with special reference to food sovereignty.</p>

Study Method
<p>Discussion based on reading materials.</p>
